Sam Rosenbloom

2026 CANDIDATE

BOARD OF EDUCATION Frederick County

Experience:

Over 30 yrs of government regulatory experience in safety policy

Education:

Master of Science Nuclear Engineering

Bachelor of Science Biophysics

Additional Graduate Studies School of Public Policy and Law

Goals of Candidacy:

- Improve the focus on education's "*tip of the spear*" TEACHING AND LEARNING.
- Balance (reduce) the administrative load on the school system with a focus on teachers.
- Ensure the curriculum roadmap reflects contemporary needs of society. For example, the 70s emphasized computer science in response to widespread computer access and use. To reestablish national competitiveness…we need the right curriculum.
- Nutritional standards in the food programs are very low compared to academically competitive countries such as Japan and France. The result is overly processed foods high in sugar…a poor foundation for education.

- Finally, schools must be safe and metrics must not be managed by those administrators that seemingly benefit.
